

The first non-invasive low level LASER Body Contouring Procedure arrives in INDIA.

Unlike invasive weight loss surgery, ZERONA™ is Zero pain, Zero touch and Zero down time procedure using a low level LASER.

This revolutionary method provides results without the dangers associated with surgery, while at the same time allowing patients to remain active during treatment. The ZERONA™ protocol utilizes Erchonia®'s patented and clinically proven low-level laser technology.

ZERONA® is a new body-sculpting procedure designed to remove fat and contour the body without invasive surgery. ZERONA® unlike other procedures, allows the patient to continue their daily activities without interruptions from surgery, pain, wounds or garments. ZERONA® works by utilizing the Erchonia® Laser Scanner to emulsify adipose tissue which then releases into the interstitial space.

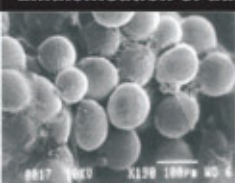

membrane of an adipose cell.

This pore is the direct result of safe, low-level laser stimulation and the reason why the triglycerides and fatty acids are able to move into the interstitial space. The tiny pore causes no damage to the cell. It simply allows the fatty content to safely evacuate the cell.

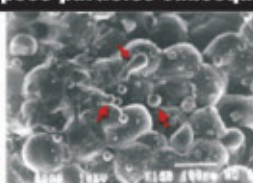

This technology is developed and patented by Erchonia Corp., Texas, USA.

With more than 13,500 patients being treated with Zerona, this technology has

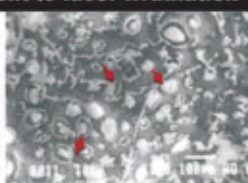

Emulsification of adipose particles subsequent to laser irradiation

Untreated adipose particle

Laser treated at 2 Minutes

Laser treated at 6 Minutes

The excess fat is passed through the body during its normal course of detoxification.

The ZERONA™ procedure was proven through a double-blind, randomized, multi-site, and placebo-controlled study in which patients, on average, lost 5.64 inches from their waist, hips, and thighs. This result is dramatic compared to the placebo group, which only lost an average of half an inch.

How Triglycerides and Fatty Acids Escape? Above images show the formation of a transitory pore forming in the bi-lipid

brought revolution in body shaping industry in USA and now is ready to spread its wings in Indian subcontinent.

With the great successful experiences with more than thousand patients in Katy, Sugarland, Houston and associated New York centers AMAYA™ Clinic, Mumbai is the proud first clinic in India to start Zerona treatments.

To know more about Zerona treatments Call +91-22-65130093 / +91-9987002515 Or log in at: www.amayaclinic.com

For Doctors interested to start ZERONA procedures in their facility, early bird offers and demonstration of the machine:
